Prescription Drug Take-Back Program

-Providing individuals with a secure and convenient way to dispose of controlled substances.

-Prevents misuse and abuse of these substances while being environmentally friendly.

-Unused prescription medications can be dangerous.

-After the expiration date, medicines start to lose their effectiveness.

-Unused medicine is a danger to children. The American Association of Poison Control Centers reported that half of all poisoning exposures in 2011 involved children under age 6.

-Having multiple prescriptions, especially pain killers, may attract crime or family/friends dealing with addiction.

Dispose of them at your closest permanent drug drop box!
